- Average Daily Volume.....44,808

PORTFOLIO MANAGER

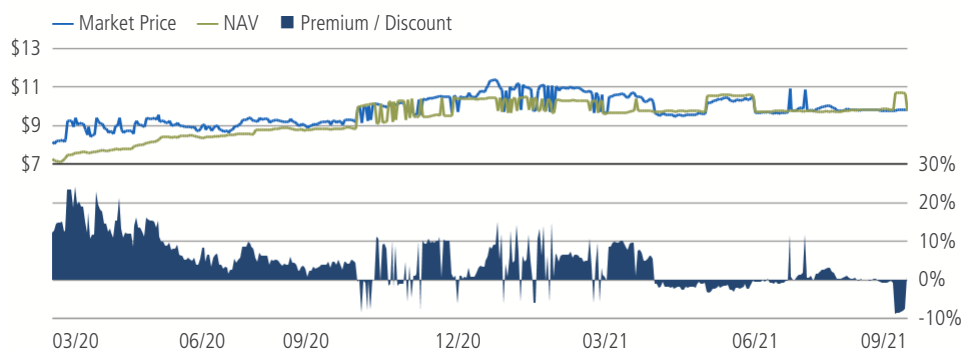

Alfred Murata, Dan Ivascyn & Joshua Anderson

Pursues income across global fixed-income sectors

The global economic landscape is constantly changing, causing different bond sectors to go in and out of favour. This Fund's multi-sector approach allows it to seek out the best income generating ideas in any given market climate, targeting multiple sources of income from a global opportunity set.

- **Offers access to PIMCO's best income-generating ideas** across multiple global fixed-income sectors, including mortgage-backed securities, investment-grade and high-yield corporates, developed and emerging markets corporate and sovereign bonds, other income-producing securities and related derivative instruments
- The fund may make substantial use of interest rate swap and other derivatives transactions ("paired swap transactions") for the principal purpose of generating distributable gains that are not part of the fund's duration or yield curve management strategies.
- **Dynamic sector allocation** reflects PIMCO's macroeconomic views and assessments of relative value and credit market trends
- **Benefits** from PIMCO's robust credit research capabilities and risk management

Market Price / NAV – Trailing 18 Months (daily pricing)

Avg. annual total returns (%) as of 30 Sep '21	1-mo.	3-mo.	1-yr.	3-yr.	5-yr.	Inc.
PIMCO Global Income Opportunities Fund at Market Price	0.68	3.12	16.84	5.75	11.46	8.05
PIMCO Global Income Opportunities Fund at NAV	0.07	1.97	19.36	7.21	10.30	8.60

Calendar year returns (%)	'15	'16	'17	'18	'19	'20	YTD
PIMCO Global Income Opportunities Fund at Market Price	-5.44	22.54	25.30	-0.50	27.05	-4.19	6.14
PIMCO Global Income Opportunities Fund at NAV	-0.68	18.47	22.21	2.69	11.31	5.40	7.38

You will usually pay brokerage fees to your dealer if you purchase or sell units of the Fund on the Toronto Stock Exchange (the "TSX"). If the units are purchased or sold on the TSX, investors may pay more than the current net asset value when buying units of the Fund and may receive less than the current net asset value when selling them. There are ongoing fees and expenses associated with owning units of an investment fund. An investment fund must prepare disclosure documents that contain key information about the fund. You can find more detailed information about the Fund in these documents. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account certain fees such as redemption fees or optional charges or income taxes payable by any securityholder that would have reduced returns. Investment funds are not guaranteed, their values change frequently and past performance may not be repeated.

About PIMCO

PIMCO is one of the world's premier fixed income investment managers. Since our founding in 1971 in Newport Beach, California, we have continued to bring innovation and expertise to our partnership with clients seeking the best investment solutions. Today our professionals work in 20 offices across the globe, united by a single purpose: creating opportunities for investors in every environment.

¹ The Management Fee is applied to the Fund's total assets. Total assets is the aggregate value of the assets of the Fund.
² Distribution yields are not performance and are calculated by annualizing the most recent distribution per share and dividing by the NAV or Market Price as of the reported date.

Alfred Murata
Years of
experience: 21

Dan Ivascyn
Years of
experience: 20

Joshua Anderson
Years of
experience: 26

The fund's experienced portfolio managers, led by Alfred Murata, managing director and portfolio manager on the mortgage credit team, and Dan Ivascyn, Group CIO, managing director, member of PIMCO's Executive Committee and member of PIMCO's Investment Committee, draw on the firm's time-tested investment process: Our rigorously developed global macro outlook, bottom-up credit analysis and research teams' deep reservoir of specialized investment expertise.

¹ The Securitized bucket will include Agency MBS, non-Agency MBS, CMBS, ABS, CDO, CLO, and Pooled Funds. ² Net Other Short Duration Instruments includes securities and other instruments (except those instruments tied to emerging markets by country of risk) with an effective duration less than one year and rated investment grade or higher or, if unrated, determined by PIMCO to be of comparable quality, commingled liquidity funds, uninvested cash, interest receivables, net unsettled trades, broker money, short duration derivatives and derivatives offsets. With respect to certain categories of short duration securities, the Adviser reserves the discretion to require a minimum credit rating higher than investment grade for inclusion in this category. Derivatives Offsets includes offsets associated with investments in futures, swaps and other derivatives. Such offsets may be taken at the notional value of the derivative position.

Investors should carefully consider the fund's investment objectives, risks, charges and expenses before investing. The fund's disclosure documents, which contain this and other information about the fund, should be read carefully before investing. The fund is a newly organized, non-redeemable investment fund, also known as a "closed-end fund". The fund is not a complete investment program. Substantially all of the fund's portfolio may consist of below investment grade securities (commonly referred to as "high yield" securities or "junk bonds"). An investment in the fund involves a high degree of risk and should be considered speculative.

This is not an offer to sell these securities and not a solicitation of an offer to buy these securities in any state where the offer or sale is not permitted. Before you invest, you should carefully read the fund's disclosure documents and consider carefully the risks you assume when you invest in the fund's units. There can be no assurance that the fund will achieve its investment objectives or be able to structure its investment portfolio as anticipated.

A significant portion of the fund's monthly distributions may be sourced from the fund's derivatives transactions. Some or all of these transactions, such as paired swap transactions, may also generate capital losses without corresponding offsetting capital gains, such that portions of the fund's distributions recognized as ordinary income for tax purposes may be economically similar to a taxable return of capital when considered together with such capital losses.

Investments made by a Fund and the results achieved by a Fund are not expected to be the same as those made by any other PIMCO-advised Fund, including those with a similar name, investment objective or policies. A new or smaller Fund's performance may not represent how the Fund is expected to or may perform in the long-term. New Funds have limited operating histories for investors to evaluate and new and smaller Funds may not attract sufficient assets to achieve investment and trading efficiencies. A Fund may be forced to sell a comparatively large portion of its portfolio to meet significant unitholder redemptions for cash, or hold a comparatively large portion of its portfolio in cash due to significant unit purchases for cash, in each case when the Fund otherwise would not seek to do so, which may adversely affect performance.

You could lose some or all of your investment. For a summary of the risks of an investment in the fund, please see the "RISK FACTORS" section of the prospectus. Consult your financial advisor before investing. Securities of the fund are not redeemable daily.

A word about risk: Investing in the **bond market** is subject to risks, including market, interest rate, issuer, credit, inflation risk, and liquidity risk. The value of most bonds and bond strategies are impacted by changes in interest rates. Bonds and bond strategies with longer durations tend to be more sensitive and volatile than those with shorter durations; bond prices generally fall as interest rates rise, and low interest rate environments increase this risk. Reductions in bond counterparty capacity may contribute to decreased market liquidity and increased price volatility. Bond investments may be worth more or less than the original cost when redeemed. Investing in **foreign-denominated and/or -domiciled securities** may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets. **Sovereign securities** are generally backed by the issuing government. Obligations of U.S. government agencies and authorities are supported by varying degrees, but are generally not backed by the full faith of the U.S. government. Portfolios that invest in such securities are not guaranteed and will fluctuate in value. **High yield, lower-rated securities** involve greater risk than higher-rated securities; portfolios that invest in them may be subject to greater levels of credit and liquidity risk than portfolios that do not. The use of **leverage** may cause a portfolio to liquidate positions when it may not be advantageous to do so to satisfy its obligations or to meet segregation requirements. Leverage, including borrowing, may cause a portfolio to be more volatile than if the portfolio had not been leveraged. **Derivatives** may involve certain costs and risks, such as

liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could lose more than the amount invested. **Diversification** does not ensure against loss.

The Fund may invest directly or indirectly in securities of stressed or distressed issuers, which include securities at risk of being in default as to the repayment of principal and/or interest at the time of acquisition by the Fund or that are rated in the lower rating categories by one or more nationally recognized statistical rating organizations (for example, Ca or lower by Moody's or CC or lower by S&P or Fitch) or, if unrated, are determined by PIMCO to be of comparable quality. Debt instruments of below investment grade quality (below Baa3 by Moody's or below BBB- by S&P or Fitch) are regarded as having predominantly speculative characteristics with respect to capacity to pay interest and to repay principal, and are commonly referred to as "high yield" securities or "junk bonds." Debt instruments in the lowest investment grade category also may be considered to possess some speculative characteristics. The Fund may, for hedging, investment or leveraging purposes, make use of credit default swaps, which are contracts whereby one party makes periodic payments to a counterparty in exchange for the right to receive from the counterparty a payment equal to the par (or other agreed upon) value of a referenced debt obligation in the event of a default or other credit event by the issuer of the debt obligation.

Total net asset value (NAV) return measures the change in NAV per unit over the period indicated. Total market value return is computed based upon the Fund's TSX market price per unit and excludes the effects of brokerage commissions. Distributions are assumed, for purposes of these calculations, to be reinvested at prices obtained under the Fund's distribution-reinvestment plan. As with any stock, the price of the fund's common shares will fluctuate with market conditions and other factors. Securities of closed-end funds frequently trade at a price that is less than (a "discount") or more than (a "premium") from their net asset value. If the fund's units trade at a premium to net asset value, there is no assurance that any such premium will be sustained for any period of time and will not decrease, or that the units will not trade at a discount to net asset value thereafter. Additionally, the fund's distribution rate may be affected by numerous factors, including changes in realized and projected market returns, fund performance, and other factors. There can be no assurance that a change in market conditions or other factors will not result in a change in the fund distribution rate at a future time.
