

# PIMCO Canadian Total Return Bond Fund

## A core fixed income solution to help meet today's investment challenges

This fund is focused on maximizing total return potential while preserving principal for Canadian fixed income investors. Unlike funds that simply seek the highest yield, this fund aims to provide investors with a combination of income, capital appreciation and capital preservation potential.

- **Quality, diversification, flexibility** The fund emphasizes higher quality, intermediate-term bonds and aims to avoid concentrated risk exposure by being diversified across the fixed income opportunity set. Its flexibility to respond to changing economic conditions helps it manage overall risk and increase total return potential.
- **An established investment process** The fund's portfolio positioning and security selection are guided by PIMCO's time-tested investment process: our rigorously developed macro outlook, bottom-up credit analysis and our research teams' deep reservoir of specialized investment expertise.
- **A risk-focused approach** The fund's total return approach, a concept pioneered by PIMCO, seeks to protect principal rather than simply reaching for the highest yields. In addition to employing sophisticated risk controls, the fund also benefits from the firm's efforts to identify major market risks early and position portfolios accordingly.

The Growth of \$10,000 chart shown is used only to illustrate the effects of the compound growth rate and is not intended to reflect future values of the mutual fund or returns on investment in the mutual fund.

### Avg. annual total returns (%) as of 29 Feb '24

	1 mos.	3 mos.	6 mos.	1 Yr.	3 Yrs.	5 Yrs.	10 Yrs.	SI
PIMCO Canadian Total Return Bond Fund A	-0.24	2.13	4.08	4.29	-2.61	0.39	1.36	2.12
FTSE Canada Universe Bond Index	-0.34	1.66	3.64	3.79	-2.17	0.65	1.94	2.67

### Calendar Year Returns

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	YTD
PIMCO Canadian Total Return Bond Fund A	7.29	2.75	1.13	1.38	0.39	6.39	9.66	-2.88	-13.35	7.30	-1.47
FTSE Canada Universe Bond Index	8.79	3.52	1.66	2.52	1.41	6.87	8.68	-2.54	-11.69	6.69	-1.71

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all dividends and does not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

Differences in the Fund's performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index.

## Fund Data

Fund Inception Date	20 January 2011
Series Inception Date	20 January 2011
Total Net Assets CAD (in millions)	\$498.5
Series A Fund Code	PMO002
Series A MER <sup>1</sup>	1.13%
Series A Management Fee	1.00%

<sup>1</sup> As of June 30 2023. Management expense ratio is based on total expenses (excluding distributions, commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

## Fund Statistics

Effective Duration (yrs)	7.02
Effective Maturity (yrs)	9.83
Sharpe Ratio (10 year)	0.03
Volatility (10 year)	5.39%
Benchmark	FTSE Canada Universe Bond Index

## Volatility Meter/Risk Rating

Low	Low to medium	Medium	Medium to high	High

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

## Portfolio Manager

Marc Seidner, Vinayak Seshasayee, Michael Kim, David Braun

**Sector Diversification (Duration%)**

Canada	32.05
Provincial	49.30
Canadian Credit	11.33
Foreign	2.20
ILB	0.00
High Yield Credit	0.28
Emerging Markets <sup>Q</sup>	0.15
Canadian Other	4.23
Net Other Short Duration Instruments <sup>R</sup>	0.45

*No offering is being made by this material. Interested investors should obtain a copy of the prospectus, which is available from your Financial Advisor.*

<sup>Q</sup>Short duration emerging markets instruments includes an emerging market security or other instrument economically tied to an emerging market country by country of risk with an effective duration less than one year and rated investment grade or higher or if unrated, determined to be similar quality by PIMCO. Emerging Markets includes the value of short duration emerging markets instruments previously reported in another category.

<sup>R</sup>Net Other Short Duration Instruments includes securities and other instruments (except instruments tied to emerging markets by country of risk) with an effective duration less than one year and rated investment grade or higher or, if unrated, determined by PIMCO to be of comparable quality, commingled liquidity funds, uninvested cash, interest receivables, net unsettled trades, broker money, short duration derivatives and derivatives offsets. With respect to certain categories of short duration securities, the Adviser reserves the discretion to require a minimum credit rating higher than investment grade for inclusion in this category. Derivatives Offsets includes offsets associated with investments in futures, swaps and other derivatives. Such offsets may be taken at the notional value of the derivative position.

**Past performance is not a guarantee or a reliable indicator of future results.** The performance figures presented reflect the total return performance and reflect changes in unit price and reinvestment of dividend and capital gain distributions. All periods longer than one year are annualized. Funds typically offer different series, which are subject to different fees and expenses (which may affect performance), having different minimum investment requirements and are entitled to different services. Investments made by a Fund and the results achieved by a Fund are not expected to be the same as those made by any other PIMCO-advised Fund, including those with a similar name, investment objective or policies. A new or smaller Fund's performance may not represent how the Fund is expected to or may perform in the long-term. New Funds have limited operating histories for investors to evaluate and new and smaller Funds may not attract sufficient assets to achieve investment and trading efficiencies. A Fund may be forced to sell a comparatively large portion of its portfolio to meet significant unitholder redemptions for cash, or hold a comparatively large portion of its portfolio in cash due to significant unit purchases for cash, in each case when the Fund otherwise would not seek to do so, which may adversely affect performance.

Funds typically offer different series, which are subject to different fees and expenses (which may affect performance), having different minimum investment requirements and are entitled to different services.

**A word about risk:** Investing in the **bond market** is subject to risks, including market, interest rate, issuer, credit, inflation risk, and liquidity risk. The value of most bonds and bond strategies are impacted by changes in interest rates. Bonds and bond strategies with longer durations tend to be more sensitive and volatile than those with shorter durations; bond prices generally fall as interest rates rise, and low interest rate environments increase this risk. Reductions in bond counterparty capacity may contribute to decreased market liquidity and increased price volatility. Bond investments may be worth more or less than the original cost when redeemed. Investing in **foreign denominated and/or domiciled securities** may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets. Mortgage- and asset-backed securities may be sensitive to changes in interest rates, subject to early repayment risk, and while generally supported by a government, government-agency or private guarantor, there is no assurance that the guarantor will meet its obligations. **High-yield, lower-rated, securities** involve greater risk than higher-rated securities; portfolios that invest in them may be subject to greater levels of credit and liquidity risk than portfolios that do not. **Commodities** contain heightened risk, including market, political, regulatory and natural conditions, and may not be appropriate for all investors. **Equities** may decline in value due to both real and perceived general market, economic and industry conditions. Convertible securities may be called before intended, which may have an adverse effect on investment objectives. Entering into **short sales** includes the potential for loss of more money than the actual cost of the investment, and the risk that the third party to the short sale may fail to honor its contract terms, causing a loss to the portfolio. **Currency rates** may fluctuate significantly over short periods of time and may reduce the returns of a portfolio. **Derivatives** may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could lose more than the amount invested. The Fund is **non-diversified**, which means that it may concentrate its assets in a smaller number of issuers than a diversified fund.

**Portfolio structure** is subject to change without notice and may not be representative of current or future allocations.

Although the Fund may seek to maintain stable distributions, the Fund's distribution rates may be affected by numerous factors, including but not limited to changes in realized and projected market returns, fluctuations in market interest rates, Fund performance, and other factors. There can be no assurance that a change in market conditions or other factors will not result in a change in the Fund's distribution rate or that the rate will be sustainable in the future. For instance, during periods of low or declining interest rates, the Fund's distributable income and dividend levels may decline for many reasons. For example, the Fund may have to deploy uninvested assets (whether from purchases of Fund units, proceeds from matured, traded or called debt obligations or other sources) in new, lower yielding instruments. Additionally, payments from certain instruments that may be held by the Fund (such as variable and floating rate securities) may be negatively impacted by declining interest rates, which may also lead to a decline in the Fund's distributable income and dividend levels.

**Duration** is a measure of a portfolio's price sensitivity expressed in years.

The **Sharpe Ratio** measures the risk-adjusted performance. The risk-free rate is subtracted from the rate of return for a portfolio and the result is divided by the standard deviation of the portfolio returns.

**Volatility** is measured by the standard deviation, or dispersion of a set of data from its mean, based on historical portfolio returns. A larger spread of data indicates higher standard deviation and higher volatility.

**Effective maturity** is a weighted average of all the maturities of the bonds in a portfolio, computed by weighting each bond's effective maturity by the market value of the security.

FTSE Canada Universe Bond Index is designed to be a broad measure of the Canadian investment-grade fixed income market. Returns are calculated daily, and are weighted by market capitalization, so that the return on a bond influences the return on the index in proportion to the bond's market value. It is intended to be a transparent index, with individual security holdings disclosed electronically each day. The Universe Index is divided into a variety of sub-indexes according to term and credit. The main term subsectors are Short, Mid, and Long. There are four main credit or borrower categories: bonds issued by the Government of Canada (including Crown Corporations), Provincial bonds (including provincially-guaranteed securities), Municipal Bonds, and Corporate Bonds. The Corporate sector is further divided into sub-sectors based on credit rating: a combined AAA/AA sector, a single-A sector, and a BBB sector. It is not possible to invest directly in an unmanaged index.
